

Feb 3 2025

Attendees

Ashley, Ben C, Adam, Spencer, Braden, Ben D, Steven

- Steven left early

Goals

- Discuss our first sprint
- goals of the next sprint
- assign tasks

Notes

Meeting began with discussing the how the first sprint went, every person went through their tasks and presented what they did. The team agreed to hold our sprint review and retrospective meeting in the next meeting. This meeting focused on organizing tasks for our second sprint and assigning everyone tasks for the second sprint.

Adam mentioned he finished and item lists in the database just needs to do the controller. Ben D talked about his tasks and what he finished. There was also clarification on pushing and pulling on GitHub and how to do so from his own staging dv branch. Discussed data transfer model instead of sending models back and forth. A discussion from Adam began with how to approach multiple items per listing and how to approach availability. What the difference between in stock vs availability is (date an time, start and end), can size and colour can effect the price, sale price and then for promotion or sale price.

Braden mentioned that he finished designing the profile page. Spencer discussed problems he had problems with controllers and Ben C demonstrated how to try and fix the problem. Postman/swagger discussed and API calls for specific components, to ensure that API calls work. Ben C mentioned how he is touching the front-end work.
