

jan 27 2025

Attendees

Ashley, Ben C, Adam, Spencer, Braden, Steven, Ben D

Goals:

- Discuss how the weekends tasks went

Notes:

Meeting began with a general discussion about how the design of the project was going, with the group agreeing that we need a "owner view" of the shop as opposed to just the customer view. There was also a discussion about the database and the repository and how they are being used. Ben C showcased the landing page that he started over the weekend, along with the register page.

Trouble shooting some problems Ben D was having with setting up local host was also done. Followed up with a discussion of the view of the database. The next item discussed was the the various features that will be available and various functionalities that will available in the product. This included recovering passwords, subpages, categorises for the products listed and subcategories. Adding a profile page, The ability to edit the shop from the shop view, edit categories, and the scope of the the colours size and banners available.
