

April 21 2025

Attendees:

Ashley, Spencer, Adam, Braden, Steven, Ben C, Ben D

Goals:

- Discuss what was done over the weekend
- Discuss presentation
- What next to do

Notes:

Meeting began with a discussion about what was pushed over the weekend and what was worked on. This included a demo of what Ben D worked on - the store editor and the store dashboard pages. He mentioned that he will be going in today to fix minor things to ensure everything is working properly. Adam mentioned he is working on creating graphs for the analytics page and will be using d3, and he will be pushing those changes soon. Braden mentioned he pushed all of his work. Ben C mentioned he is working on front end logic and functionality, and mobile functionality to ensure that everything is working correctly.

Team Push all changes they made to git and everyone branch was updated to ensure that all members were working with the same content. Ashley mentioned manual testing and discussed a manual testing spreadsheet she made, members were tasked with going through the application and testing it - filling out the spreadsheet as they go.

Team also discussed the presentation to happen Wednesday and reviewed the slideshow that Ashley made, and assigned slides to each member of the team.

Team also agreed that an additional meeting Tuesday would be necessary to ensure that we are ready before the presentation.
