

# March 12 2025

Attendees:

Ashley, Adam, Spencer, Steven, Braden, Ben C, Ben D

Goals:

- sprint review
- sprint retrospective

SPRINT Four REVIEW

Review Notes →

Did we meet the goals we wanted to achieve?

The review began with the group discussing tasks that had been done this sprint, with the group reviewing the Jira board and looking at each of the individual tasks. Showcasing what had been done for each of the tasks and what did not get finished during the sprint. There was specific conversation had about the store pages - setting up and the frontend and backend of what had been done for that specifically so we can move further forward.

Retrospective Review →

Did our approach to the scrum process satisfy everyone? Are we satisfied with the amount of meetings that we are holding per week, the amount of work we are doing per week, what we speak about during the meetings and the length of the meetings.

The team reviewed what had been done for this sprint, and agreed that the approach in which we are going about the process is satisfactory. The team agrees that the amount of work, and the amount of meetings taking place is good and would like to continue with them going forward. Additionally, there was mention from some members that feel that they personally need to be doing more within the week and going forward they will be more intentional with that. The length of meetings was also agreed upon that we like and feel they are helping meet our goals.

Are we implementing our tools in the best way and using them to effectively?

The team was happy with the tools being used and how they are being used. In regards to discord the team is happy with the amount of communication being had. The team did mention concerns about Jira and the amount of updates being contributed to it. Some members mentioned that they are not used to working in this format and will work to improve on updating the board and team members on tasks that they are working on and what they will be working on going forward.

Comments the group would like to share on how they will be improving in the next sprint.

Ben C wanted to mention that communication was better this sprint, there were more members reaching out to him for help with different problems regarding the stack and GitHub. However he also mentioned for members to not merge pull requests on GitHub, so that he can review them first and manage conflicts. Braden also wanted to mention that he will improving on the amount of work he is contributing due to him fixing bugs and the software now fully functional on his personal computer.

Are there other thoughts that the group would like to add to to the review?

Some comments that the group wanted to add to was that we want as a team to be using Jira more effectively, to the extent of making sure that tasks are updated correctly and we are meeting deadlines and working tot he best of our ability. Steven also mentioned that he got the testing software working and will be adding more to the project now that it is working correctly.

Going forward our team wants to prioritize the unit testing of the API's, and looking further into stripe for payment of the services and items that customers will be buying.
