Jan 20 2025

Attendees

Ben C, Ashley, Adam, Ben D, Braden, Spencer, Steven

- Steven and Spencer joined late

Goals:

discuss distribution of tasks

Plan for the next week

Notes

The meeting started with talking about how the design of the application should look like, and the group also discussed if we should be including a subscription plan with that ultimately being vetoed by the group and us deciding that we should have a free application for all users to use.

The design talk included out the flow of the application should work, specifically if you are a shop owner the analytics dashboard as soon as you long in should be the main page, along with your default store page

The promotions page was also discussed, how the promo codes will will, what specially they can be applied to, the email sections and what mass email subscriptions look like → this needs to be researched further

Tasks were discussed fort he week, Ashley to work on UI designs and Adam to look at adding things to database. The rest of the subtasks were delegated for the sprint to members throughout the group, for more information the jira board is the most up to date.

It was also discussed the convention to use in the front end and backend, the naming should be the same for both front and backend. Automatic testing each

member should be doing for their portion that they add.

Next Meeting:

- Discuss how tasks are coming along
