March 5 2025

Attendees:

Ashley, Adam, Spencer, Ben D, Steven, Braden, Ben C

Goals:

- Discuss how tasks assigned are going
- discuss when the presentation date would be best

Notes:

Meeting began with a discussion on what the team members have been working on during the week. Ben C mentioned he is working on the stores item and categories front end and backend. Discussed how the store should be working, in regards to categories, their IDs and the listing and item tiles. They should load based on the category and ID associated with it. Discussed that layouts of the store implemented further down the line. Ben D mentioned he split up the store and item controller and updated the code to reflect that. Spencer mentioned he is working on the dashboard. This was followed up with a discussion on the backend and the database and views. Steven brought up problems he was having with X-unit, and the team tried to troubleshoot. Also Ashley shared a when2meet link so the group can discuss availability for the the final presentation.
